PROFESSIONAL SUMMARY

Results-driven **Java Backend Developer** with 6 months of professional experience designing and deploying scalable backend systems using **Java, Spring Boot, Spring Security, and RESTful APIs**. Proven ability to integrate third-party APIs (Microsoft Graph API, OAuth 2.0, Firebase Cloud Messaging), optimize large-scale data processing pipelines, and deliver measurable improvements of **30% faster processing** and **40% storage reduction**. Strong problem-solving skills with **200+ DSA solutions** on LeetCode and GeeksforGeeks. Seeking a Java Backend or Full Stack Developer role to contribute to production-grade applications.

TECHNICAL SKILLS

Languages	Java, SQL, JavaScript
Frameworks	Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate
API & Auth	RESTful APIs, OAuth 2.0, JWT Authentication, Microsoft Graph API, Firebase FCM
Web Technologies	HTML5, CSS3, JavaScript, Thymeleaf, Bootstrap
Database	MySQL, JDBC
Tools	Git, GitHub, Maven, Postman, IntelliJ IDEA, VS Code, Eclipse
Core CS	OOP, Data Structures & Algorithms, DBMS, Exception Handling, MVC Architecture
DSA Topics	Arrays, Strings, Linked Lists, Stacks, Queues, Sliding Window, Binary Search

PROFESSIONAL EXPERIENCE

Java Developer

May 2025 – October 2025

Aryson Technologies, Noida, India

Project: Aryson OneDrive Duplicate Remover – Cloud-based file management solution to detect and remove duplicate files from Microsoft OneDrive at enterprise scale.

- Architected **Spring Boot** backend modules to scan, process, and manage **10,000+ OneDrive files per single scan**, achieving high accuracy and consistent reliability across all production deployments at scale.
- Integrated **Microsoft Graph API** with **OAuth 2.0** client credentials flow for secure OneDrive authentication and file access, maintaining a **95% scan success rate** across all cycles with zero data breach incidents.
- Engineered a **hashcode-based duplicate detection algorithm** comparing file metadata and content hashes to identify and eliminate redundant files, reducing overall cloud storage consumption by up to **40%** per account.
- Applied **pagination and batch processing** strategies to the file retrieval pipeline, eliminating memory overflow errors and improving overall system throughput and processing speed by approximately **30%** for large datasets.
- Developed **responsive UI components** using HTML5, CSS3, JavaScript, Bootstrap, and Thymeleaf, delivering seamless frontend-backend integration and an intuitive user experience across all devices and screen sizes.

PROJECTS

Bharat Sarthi – Driver Booking System

GitHub

Java · Spring Boot · Spring Security · MySQL · REST API · Firebase Cloud Messaging · Maven

- Built a full-stack **driver booking platform** with user registration, login, driver search, and complete ride management features, enabling seamless real-time coordination between passengers and drivers via REST APIs.
- Integrated **Firebase Cloud Messaging (FCM)** to deliver instant push notifications for booking confirmations, ride status updates, and driver assignments, significantly improving real-time user communication and engagement.
- Secured the platform with **Spring Security** for user authentication and authorization, and designed **RESTful APIs** for driver listing, booking, and ride tracking with MySQL ensuring reliable and scalable data persistence.

Smart Contact Manager

Spring Boot · Spring Security · Spring Data JPA · MySQL · JWT · Thymeleaf · Bootstrap

- Built a full-stack contact management web application supporting **500+ contacts** with search, filtering, and category-based organization, enabling fast and efficient contact retrieval for all registered user accounts.
- Secured the application with **Spring Security and JWT-based stateless authentication**, implementing role-based access control to prevent unauthorized access to sensitive contact data and protected admin features.
- Designed **RESTful APIs** for all CRUD operations using Spring Data JPA and MySQL, and delivered a fully responsive mobile-first UI with Thymeleaf and Bootstrap featuring dynamic forms and interactive data tables.

EDUCATION

Master of Computer Applications (MCA)

2023 – 2025

Dr. A.P.J. Abdul Kalam Technical University, Lucknow

Bachelor of Computer Applications (BCA)

2018 – 2021

Dr. Bhimrao Ambedkar University, Agra

CERTIFICATIONS

- Java Programming: Problem Solving with Software** – Coursera

2024

ACHIEVEMENTS

- Solved **100+ problems** on **LeetCode** using Java.
- Solved **100+ problems** on **GeeksforGeeks** using Java.
